

Build your portfolio with Once UI's Magic Portfolio

View the [demo here](#).

asdassdasadas

Getting started

Magic Portfolio was built with [Once UI](#) for [Next.js](#). It requires Node.js v18.17+.

1. Clone the repository

```
git clone https://github.com/once-ui-system/magic-portfolio.git
```

2. Install dependencies

```
npm install
```

3. Run dev server

```
npm run dev
```

4. Edit config

```
src/app/resources/config
```

5. Edit content

```
src/app/resources/content
```

6. Create blog posts / projects

Add a new .mdx file to `src/app/blog/posts` or `src/app/work/projects`

Features

Once UI

- All tokens, components & features of [Once UI](#)

SEO

- Automatic open-graph and X image generation with next/og
- Automatic schema and metadata generation based on the content file

Design

- Responsive layout optimized for all screen sizes
- Timeless design without heavy animations and motion
- Endless customization options through [data attributes](#)

Content

- Render sections conditionally based on the content file
- Enable or disable pages for blog, work, gallery and about / CV
- Generate and display social links automatically
- Set up password protection for URLs

Localization

- A localized version of Magic Portfolio is available with the next-intl library
- To use localization, switch to the 'i18n' branch

Authors

Connect with us on [Threads](#) or [LinkedIn](#).

Lorant Toth: [Threads](#), [LinkedIn](#)
